Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species A: System for collecting and transmitting medical data over the Internet where the measuring device is a weight scale.

Species B: System for collecting and transmitting medical data over the Internet where the measuring device is a heart rate monitor.

Species C: System for collecting and transmitting medical data over the Internet where the measuring device is a blood pressure monitor.

Species D: System for collecting and transmitting medical data over the Internet where the measuring device is a coumadin monitor.

Species E: System for collecting and transmitting medical data over the Internet where the measuring device is a pulse oximeter.

Species F: System for collecting and transmitting medical data over the Internet where the measuring device is a blood glucose monitor.

Species G: System for collecting and transmitting medical data over the Internet where the measuring device is a digital thermometer.

Species H: System for collecting and transmitting medical data over the Internet where the measuring device is a fitness machine.

Also, for any Species A-H elected above, Applicant must elect an additional patentably distinct subspecies of the elected species below:

Subspecies 1: The communications system comprises a two-way pager.

Subspecies 2: The communications system comprises a cell phone.

Subspecies 3: The communications system comprises Bluetooth wireless technology.

Subspecies 4: The communications system comprises a computer connected to the Internet.

In summary, Applicant is required under 35 U.S.C. 121 to elect (1) one patentably distinct species A-H, and (2) one patentably distinct subspecies 1-4 for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-9, 21, 22, and 24-30 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John A. Jeffery whose telephone number is (703) 306-4601. The examiner can normally be reached on Monday - Thursday from 7:00 AM to 4:30 PM. The examiner can also be reached on alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robin Evans, can be reached on (703) 305-5766. All faxes should be sent to the centralized fax number at (703) 872-9306.
